93.40%

## PROJECTS

---

### **Portfolio:**

- Designed and developed a personal portfolio website to showcase projects, skills, and professional achievements.
- Project Showcase: Created sections to display projects with descriptions, links, and images.
- Built the entire website from scratch using HTML for structure, CSS for styling, and JavaScript for interactivity.
- Improved personal branding by creating an online presence with an engaging and user-friendly website.

**Technologies Used:** HTML, CSS, JavaScript

### **Online Shop :**

- Home Page : Design a layout with a header, navigation bar, product listings, and footer.
- Product Page : Create a detailed product page with images, descriptions, prices, and reviews. Use media queries to ensure the site is mobile-friendly.
- Use CSS Grid and Flexbox for creating complex layouts.

**Technologies Used:** HTML , CSS.

### **Food Waste Management System :**

- Developed the front-end interface using HTML, CSS and JavaScript ensuring user-friendly interactions.
- Search Functionality: Provided search and filter options to manage food inventory efficiently.
- Donation Feature: Integrated a functionality that allows users to donate money for food to charities or local organization.
- Enhanced sustainability by reducing food waste and providing an option for food donations.

**Technologies Used:** HTML, CSS, JavaScript
